

CASE STUDY RCHT – PHARMACY ROBOT

Sector: Health

Client: Royal Cornwall Hospital Trust

Contract Value: £70K

This contract was for the refurbishment of the General Pharmacy department and included enabling works for the installation of three new ARX drug dispensing robots at the Royal Cornwall Hospital.

LED lighting has been installed to raise the overall lighting levels in key areas of the department including the supermarket and over new touchdown workstations.

Upgraded circuit protection, air conditioning and ventilation have been installed to the ARX robots.

The heating systems were removed and replaced by fan coil units giving far greater temperature control in vital areas of the Pharmacy department for the storage of controlled drugs.
